

Cobent's CoAuthor system provides you with the ability to create high-quality interactive e-learning content – easily and effectively.

CoAuthor is Cobent's full-featured, collaborative content authoring tool that enables organisations to create high-quality, interactive learning content – without the need for programming or design skills. The web-based authoring environment makes it easy to create, manage and control projects from different locations. The comprehensive library of assets, templates, themes and interactive elements makes it easy to rapidly create professional-looking content.

- 100% programming free
- Web-based – 'zero installations or downloads'
- Rapid authoring and roll-out
- Real-time collaboration and communication portal
- Project and task management
- Reusable assets
- Intuitive and easy-to-use

## COLLABORATIVE AUTHORING

With CoAuthor, authors, designers, subject-matter experts and reviewers can collaboratively work on projects regardless of location or time-zone. CoAuthor's sophisticated groupware authoring environment allows projects to be managed and stored at a central secure location, and provides real-time access based on user-profile.

- Web-based collaboration
- Version locking and control
- Centralised object and asset library
- Built-in task management helps to streamline the development process
- Track project progress and overall development status with reports

## RAPID CONTENT AUTHORING

Creating professional looking course content is quick and easy in CoAuthor. Predefined functional modules and pre-loaded assets offer rapid content authoring without compromising on quality and usability.

- Objects and assets are reusable, helping to maintain consistency
- Use existing templates or customise them to save time
- Pre-designed elements can be dropped onto a page and used instantly
- Real-time preview, for quick and easy edits
- Course and Object tagging makes it easy to search for and reuse assets

## COAUTHOR INTERACTIVITY

Creating dynamic content is simple with CoAuthor's library of elearning exercises and interactions. These elements can be easily drag-dropped onto a page, and are immediately usable – no need for programming or complex configurations. Interactive elements are customisable, so authors are not limited to the standard look and feel. Interactive elements include:

- Multiple choice
- Drag and drop for sorting, sequencing or match the objects
- Fill in the blanks

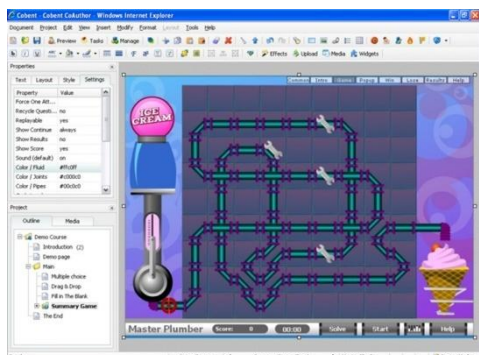

## Benefits Highlighted:

- Web-based collaborative authoring
- Zero installations or downloads
- Control over course content development
- Rapid authoring and roll-out
- Multimedia – interactivity
- Rapid roll-out of new product or process information.

## Selected Cobent Clients:

- Hot-spots
- Hot-words
- Point and click
- Interactive learning games

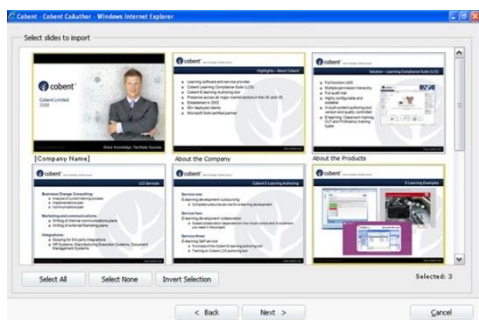

## ASSESSMENTS & QUESTIONS

Creating interactive assessment to gauge how much a learner has retained what they have learnt is effortless with CoAuthor. The system supports single or multi-chapter tests with predetermined or randomly assigned questions and includes a sophisticated grading mechanism that allows assignment of different weights per chapter or question.

- Questions repository for 'random' or self-adapting questions
- Immediate test results calculation and presentation
- Immediate feedback on a question or provide summaries at the end
- Options for review and re-sit of the tests when a student fails

## POWERPOINT INTEGRATION

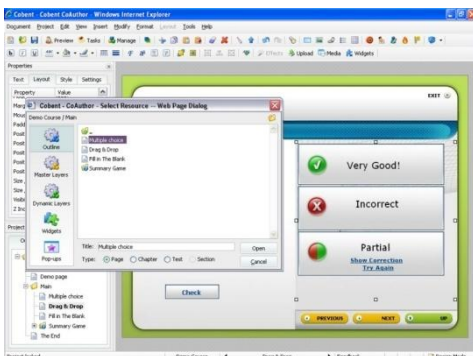

CoAuthor can turn your PowerPoint Presentations into SCORM compliant elearning through its import feature. Choose between importing the entire presentation or a selection of slides. Objects imported from PowerPoint into CoAuthor remain in their editable state for ease-of-use and reusability.

Cobent CoAuthor gives you the power to rapidly create content when you want it and how you want it!

## MULTILINGUAL

CoAuthor features multi-lingual support, so that courses can be written in a number of different languages from East-Asian to Middle-Eastern languages. This feature also supports right-to-left writing direction – a powerful feature for global organisations.

## HOSTED OR DEPLOYED

Cobent offer a hosted or deployed option. With the hosted option, the system is hosted on our servers, so you don't have to worry about the technical set-up. The deployed service provides customers with the option of installing the system on their own servers, this is ideal for any regulated organisations that have strict internet access policies.

## INTEGRATION

CoAuthor is SCORM 1.2, SCORM 2004 and AICC PENS compliant, so content created can be imported into Cobent LCS to be tracked and managed seamlessly.

## PUBLISHING

Courses can be published to the following formats for easy deployment:

- Delivery to a web server
- Downloadable Zip File
- SCORM 1.2, SCORM 2004
- Standalone Executable Application
- Executable in a self-installing package

**Contact us today to arrange an online demonstration of Cobent CoAuthor.**

## Cobent Services:

- Supply and implementation of fully compliant learning management tools.
- Supply and implementation of collaborative authoring tools.
- Consultancy and advice based on 'best-practice' knowledge and industry experience
- Development of bespoke content based on specific learning and business requirements
- Supply of off-the-shelf content for rapid deployment

## ABOUT COBENT

Cobent is a leading provider of Learning Management Systems (LMS). We have assisted many organisations throughout the UK, Europe and US in meeting training and regulatory compliance needs; including DSG International, Barclays, CIPFA, Orange, AOL and AAH Pharmaceuticals.
